

Cyber5 plan built from last year's actual Nov 27 - Dec 1 window

Basis: cyber5 replay → Thanksgiving Nov 26 to Cyber Monday Nov 30, 2026. Anonymized sample run.

\$48K

Spend, last year's window
(\$48,214)

456

Purchases (Meta-attributed)

2.6x

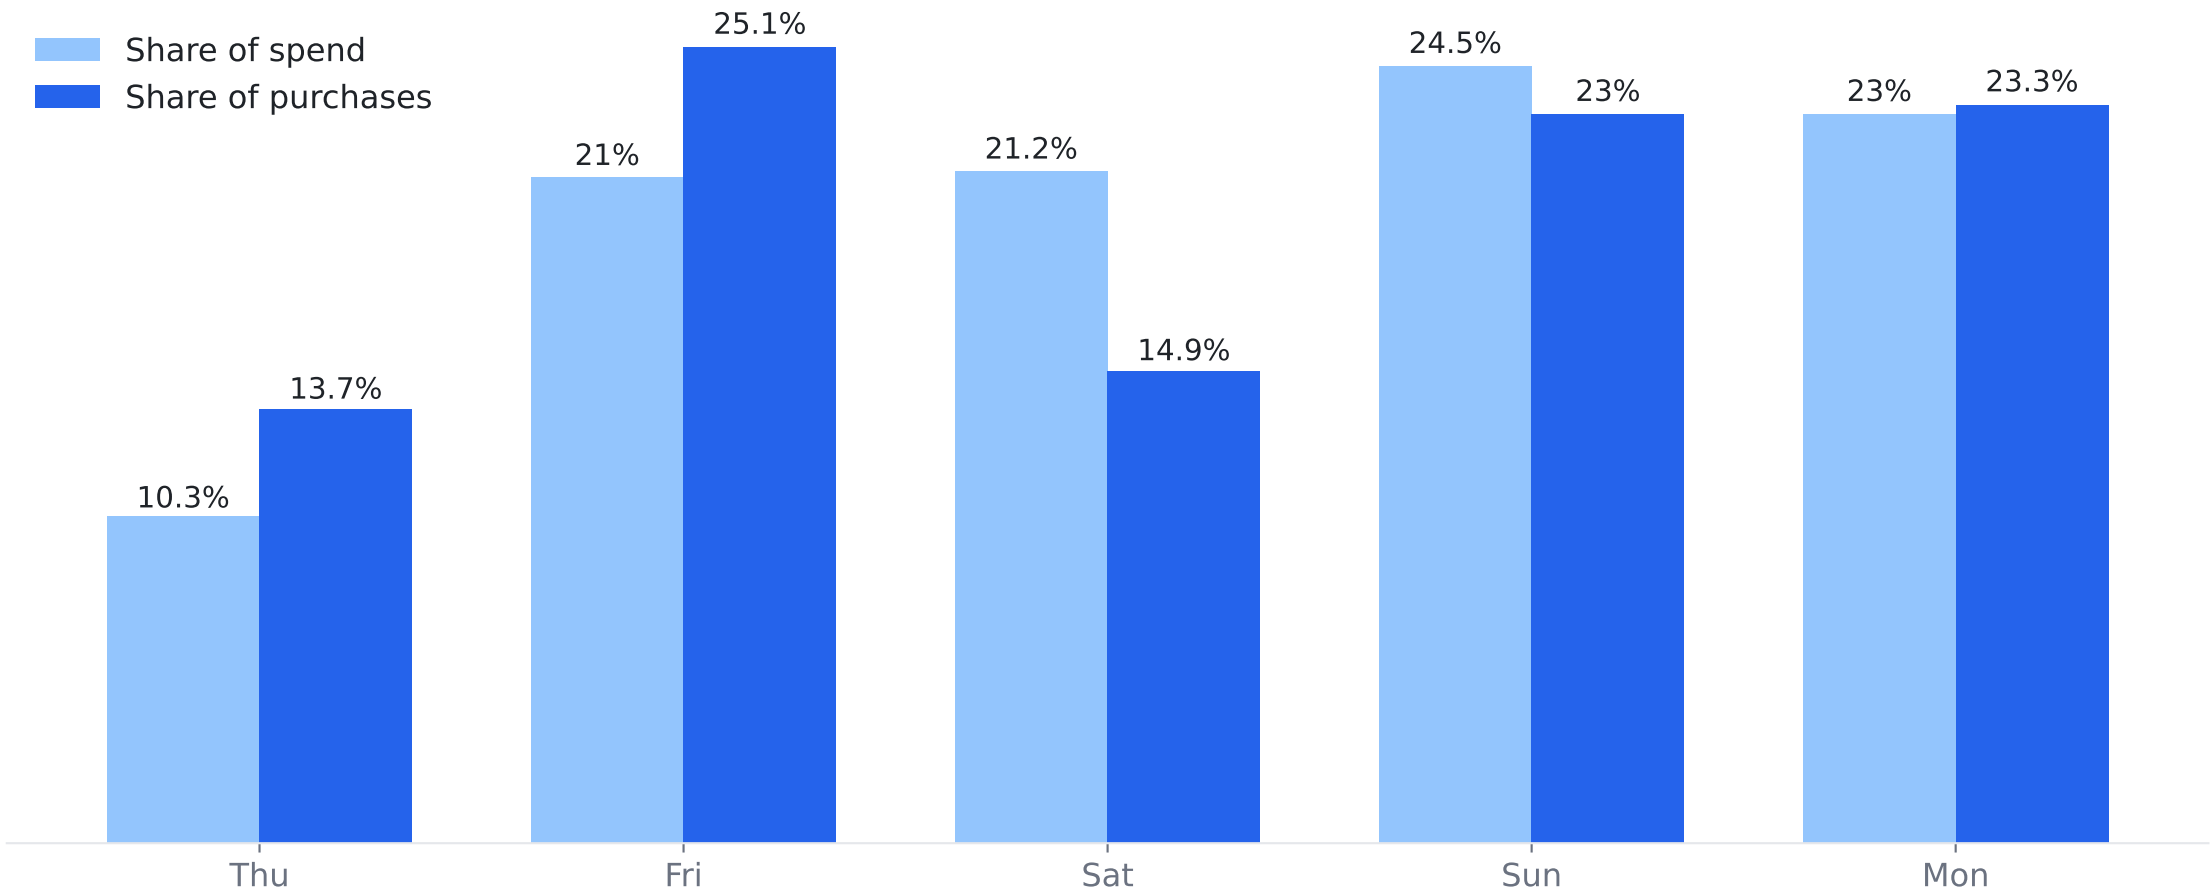

Peak day vs pre-season spend
(Sun)

1

Delivery gap (Sat
22:00-23:59)

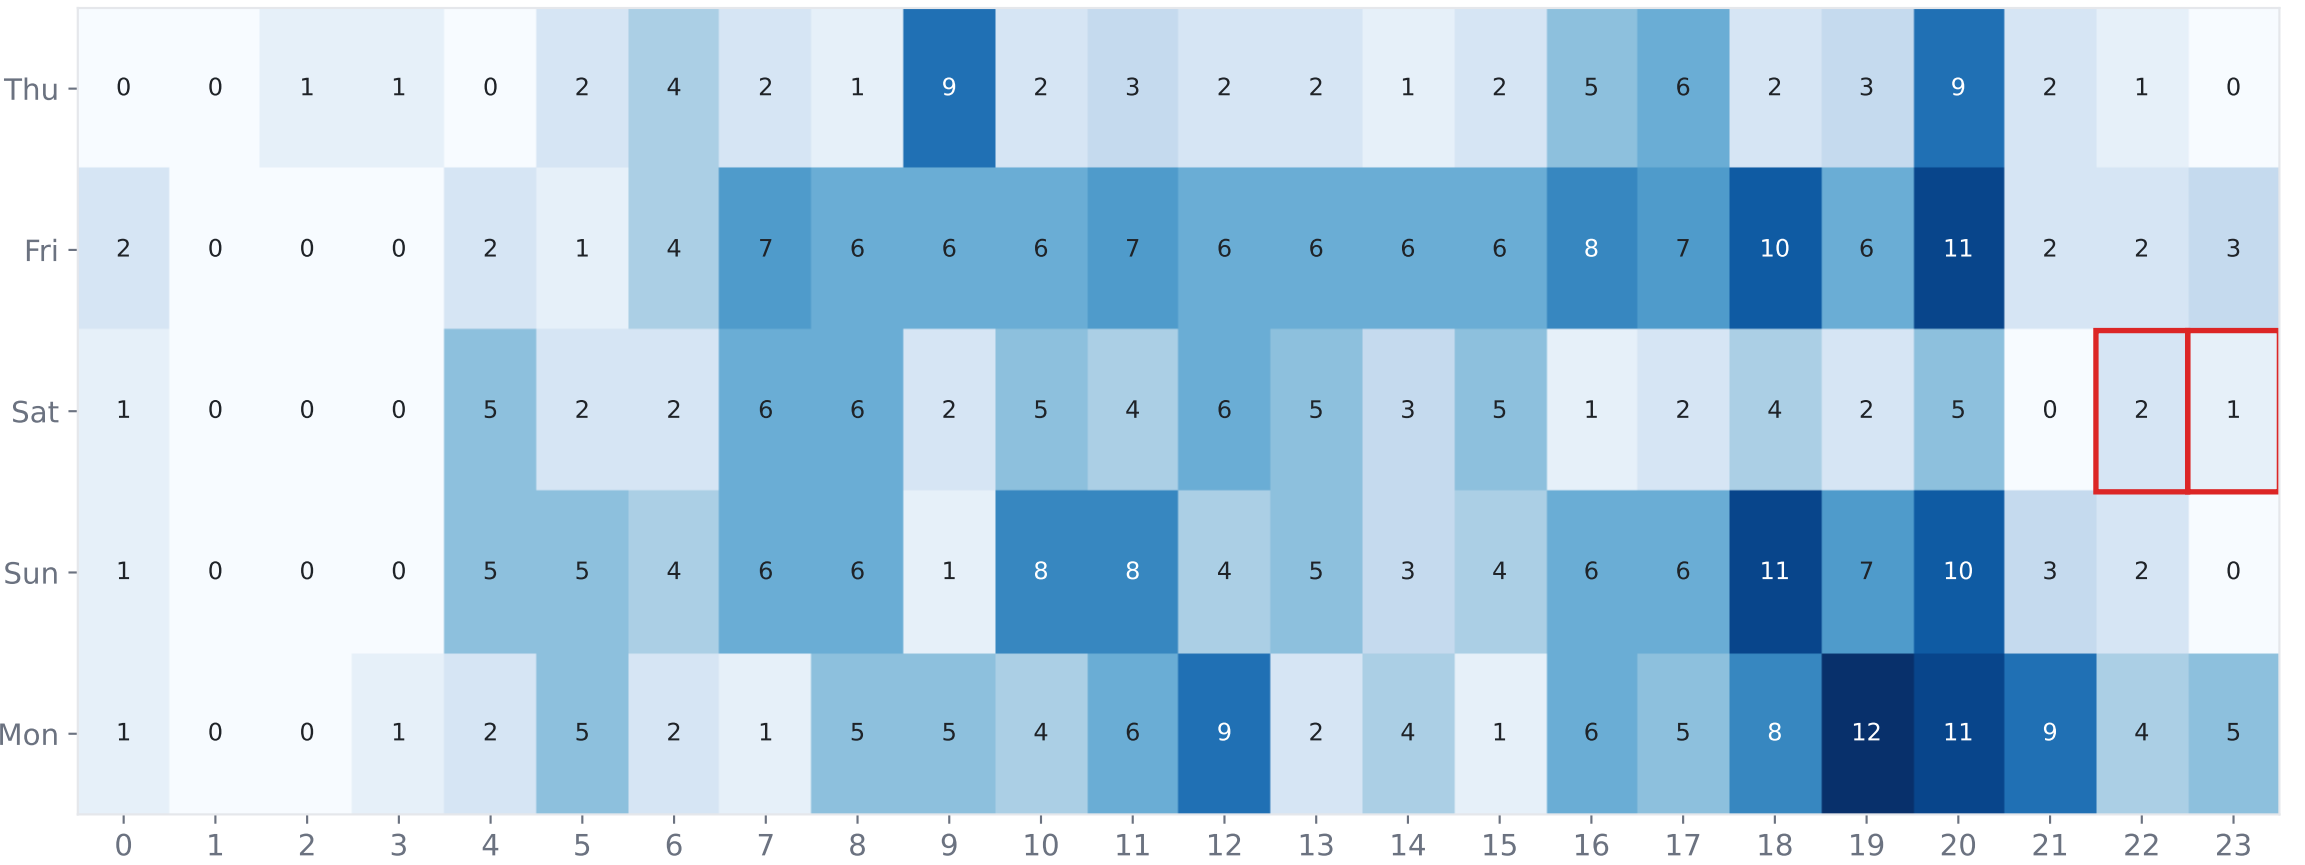

Total budget not set yet, so the plan is in shares. Promo campaigns for this year are an open question; until answered, money is split by last-30-day campaign spend.

Saturday took 21% of spend but only 15% of purchases last year

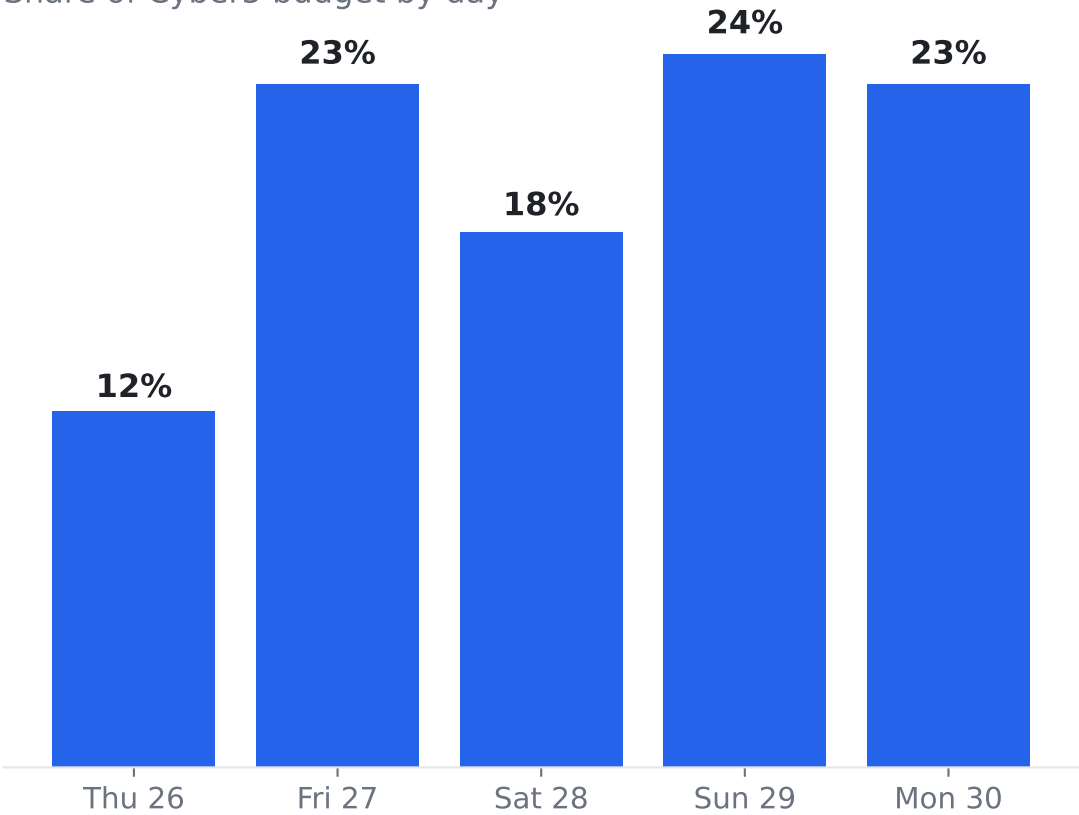

Purchases peaked in the evening; Saturday's ads went dark after 21:00

Purchases by hour, Nov 27 - Dec 1 2025. Red boxes = delivery gap (spend under 10% of the hourly average while purchases continued).

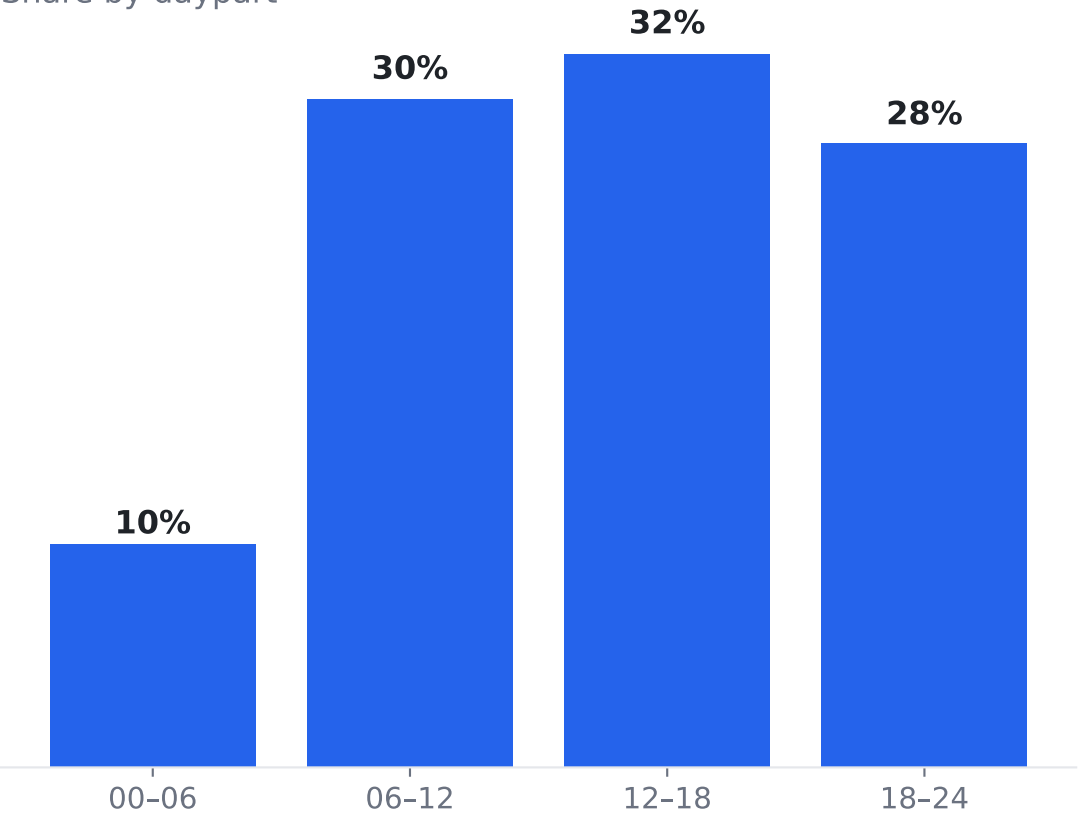

This year's plan weights Fri, Sun and Mon, and evenings

Share of Cyber5 budget by day

Share by daypart

Guard the evenings and Saturday night; keep evergreen DPA running

Guard	Why	By
Hold ~9 pts of each day for 18-24 on Mon, Sat, Sun	Evenings: 32% of purchases on 24% of spend	Before budgets
Size Saturday budgets to last until midnight	Spend fell to \$0.46/hr by 23:00 last year	Nov 19
Backup payment method + spend-limit headroom	Delivery gap Sat 22:00-23:59	Nov 19
All planned ads approved, scheduled from 12am	Delivery gap Sat 22:00-23:59	Nov 19
Keep top evergreen DPA ads funded all 5 days	\$103 vs \$169 per purchase for BFCM-offer ads	Plan

BFCM-offer ads lost 23% of click-through rate by Cyber Monday (under the 30% refresh line).
