

Sample Skincare Co. grades C for Cyber5: strong tracking, fixable gaps

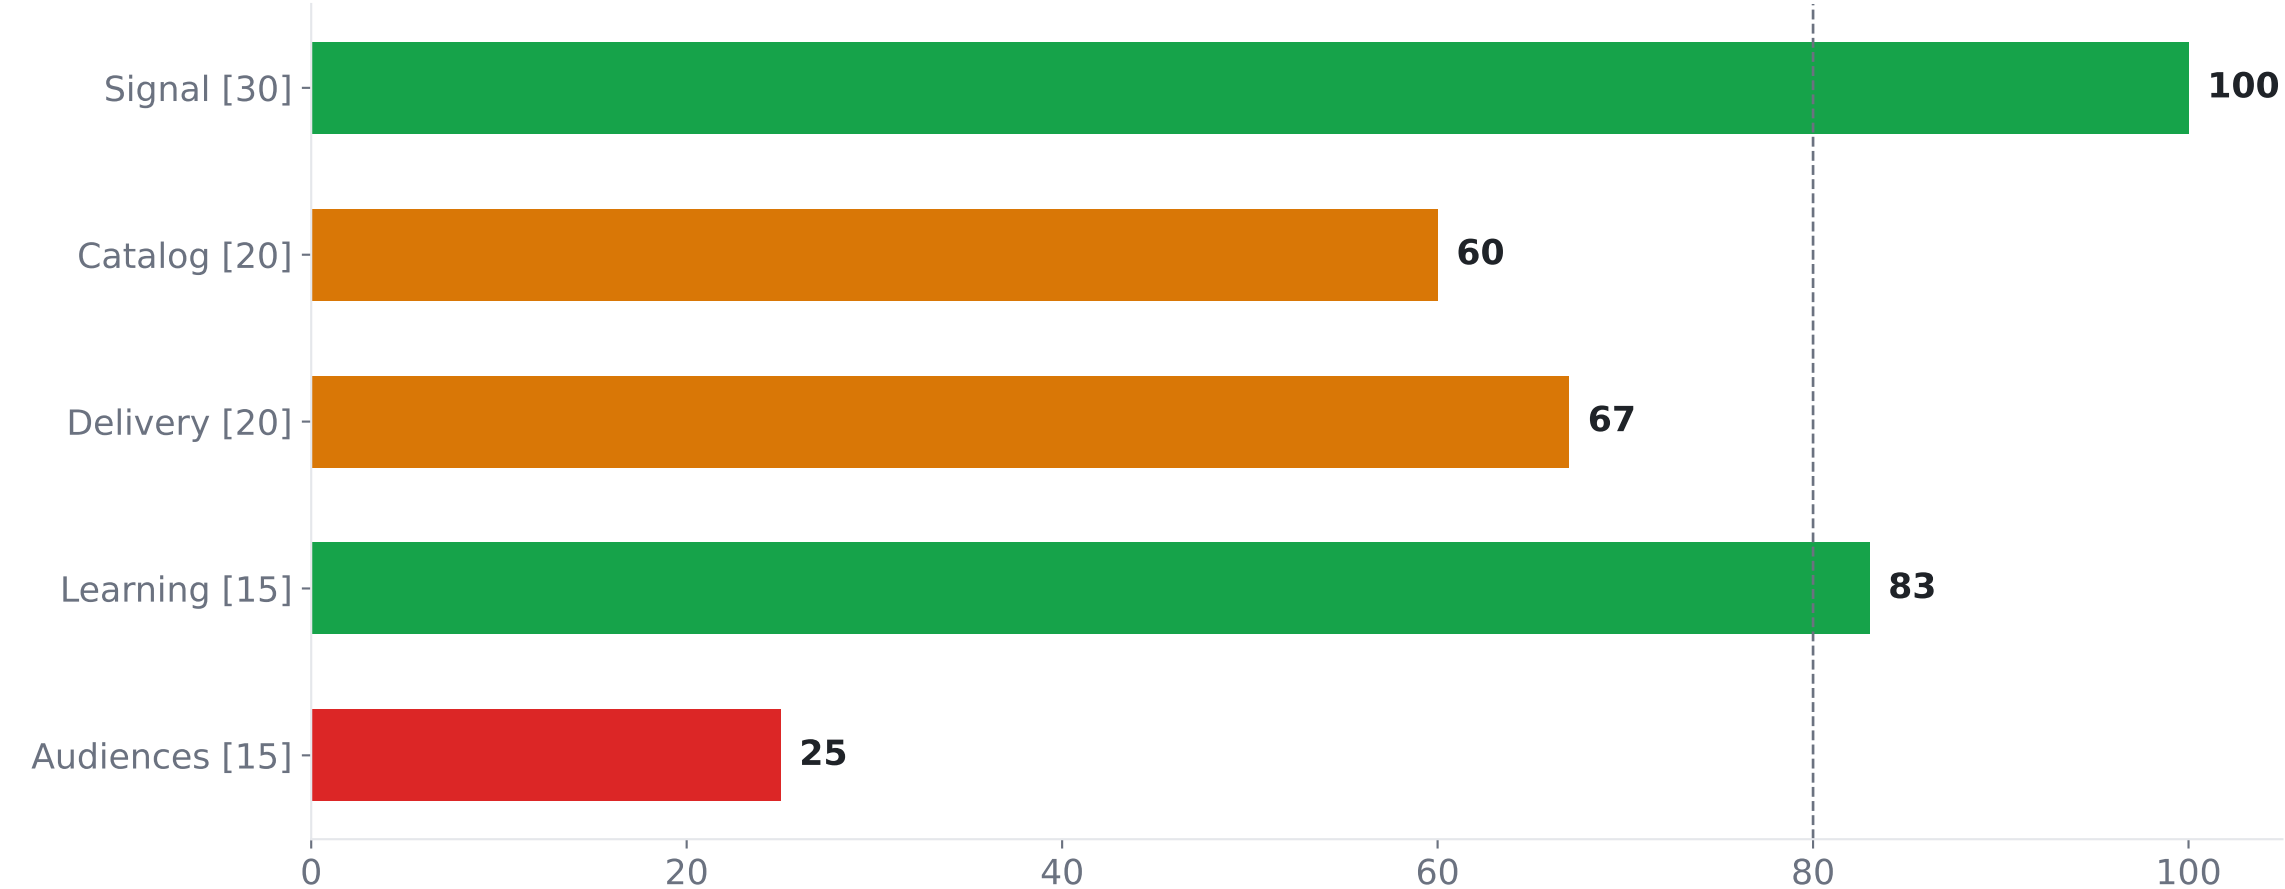

Readiness check, 52 days before the Nov 26–30 window. Anonymized sample run.

C	72	52	12
Grade	Score out of 100	Days to Cyber5	Open fixes (first due Nov 12)

No critical failures. Signal is perfect (purchase match quality 9.1, server events live). The grade is pulled down by missing 30-day warm audiences, 5 errored ads and 2 must-fix catalog visibility checks.

Audiences and catalog are the weak spots; signal is perfect

Category scores, weight in brackets. Dashed line = B grade (80).

Five fixes due first, all within hours or minutes of work

Do by	Fix	Owner	Effort
Nov 12	Fix Dynamic Ads and Shops visibility issues in the catalog	Developer / ecommerce	Hours
Nov 12	Change the 1 non-USD priced item to USD	Developer / ecommerce	Hours
Nov 12	Review inactive audiences still referenced by ad sets	Media buyer	Hours
Nov 19	Create 30-day site-visitor and 30-day add-to-cart audiences	Media buyer	Minutes
Nov 19	Turn off or republish 5 errored ads (14% of key ads)	Media buyer	Minutes

Edit freeze on key ad sets starts Nov 19.

Meta scores the account 84/100 (not part of the grade)

Meta suggestion	Points
Let Meta send people to a shop before website checkout (7 ad sets)	+6
Combine 2 similar, fragmented prospecting ad sets	+2
Advantage+ audience on the Retargeting DPA ad set	+1

Shown as Meta returned them. Not graded and not recommended by this check.
